

# CAKE CARE *instructions*

Handle the cake box from the bottom only.

Store the cake in the box in a refrigerator.

Use an air-conditioned vehicle to transport the cake and keep it away from loose objects.

Remove the cake from the fridge at least two hours before serving and let it come to room temperature.

Keep the cake level during transportation and refrigeration.

Store any leftover cake in an airtight container in the fridge.

Avoid exposing the cake to direct sunlight, moisture, and heat when not stored in the fridge.

All of our cakes are hand-made with love. We hope you enjoy!
